

What is a Portable Kit?*

The models WM3488HW or WM3488HS can be converted to work with a kitchen faucet, instead of a standard washer hook-up (hot and cold water, and a drain). This kit includes all hoses, adapters and wheels. NO ASSEMBLY required by you, except for putting the wheels on the machine.

Important notes:

In order for the portable machine to work properly, the faucet has to be turned on for the complete wash and dry cycle (the machine will take in water when it needs).

The faucet has to be turned to cold during the dry cycle. If this is not done, the dryer will NOT work!
The machine comes completely converted, minus the assembly of the wheels. Legs are left on for shipping purposes.

Price - **add \$149.95**

*Kit is not an LG® approved or manufactured product.
